

Induction Meters

All the indicators on this page are Induction Type which require only that the cable be placed in the slot frame on the rear of case.

No electrical connections or leads to hook up.

SG-1

Dual Starter Generator Current Indicator features dual ranges of 75/0/75 Amps DC and 600/0/600 Amps DC. Tester is utilized on any 6, 12, 24 or 36 volt DC electrical system for any vehicle.

663

Models 663* shown and 699 Generator Current Indicators. Inexpensive ammeters for measuring direct current up to 100 Amps.

Readability of 5 Amps.
663: 75/0/75 Amps DC
699: 100/0/100 Amps DC

763

Model 763* Induction Ammeter.

Ideal for checking low current applications such as the accessories to the electrical system. Also useful for checking grounds and low voltage leaks.

652

Models 652* shown, 672* and 629* Starter Current Indicators.

Low cost indicators for measuring approximate current drawn by starter of any engine, Also will indicate bad brushes in starter and condition of armature.

627: 400/0/400 Amps DC

629: 600/0/600 Amps DC

652: 1000/0/1000 Amps DC

(designed for diesel trucks and welders)

Display Cards

* Available on display cards shown. Indicate display cards when ordering.
